

healthy solutions...

Betasan, incorporated in 1983, with its 240 employees and two manufacturing plants in Istanbul and Kocaeli with a 10,000 m² total indoor space, is the manufacturer of a large product line comprised of adhesive bandages, flexible bandages and plasters, and is the first domestic manufacturer in this field.

Betasan, whose products are available in over 20,000 pharmacies and in all hypermarket chains throughout Turkey, is the first choice of the health professionals in over 90% of the private and state hospitals and with its Sanitabant brand has the highest brand recognition and has the highest household penetration in the country.

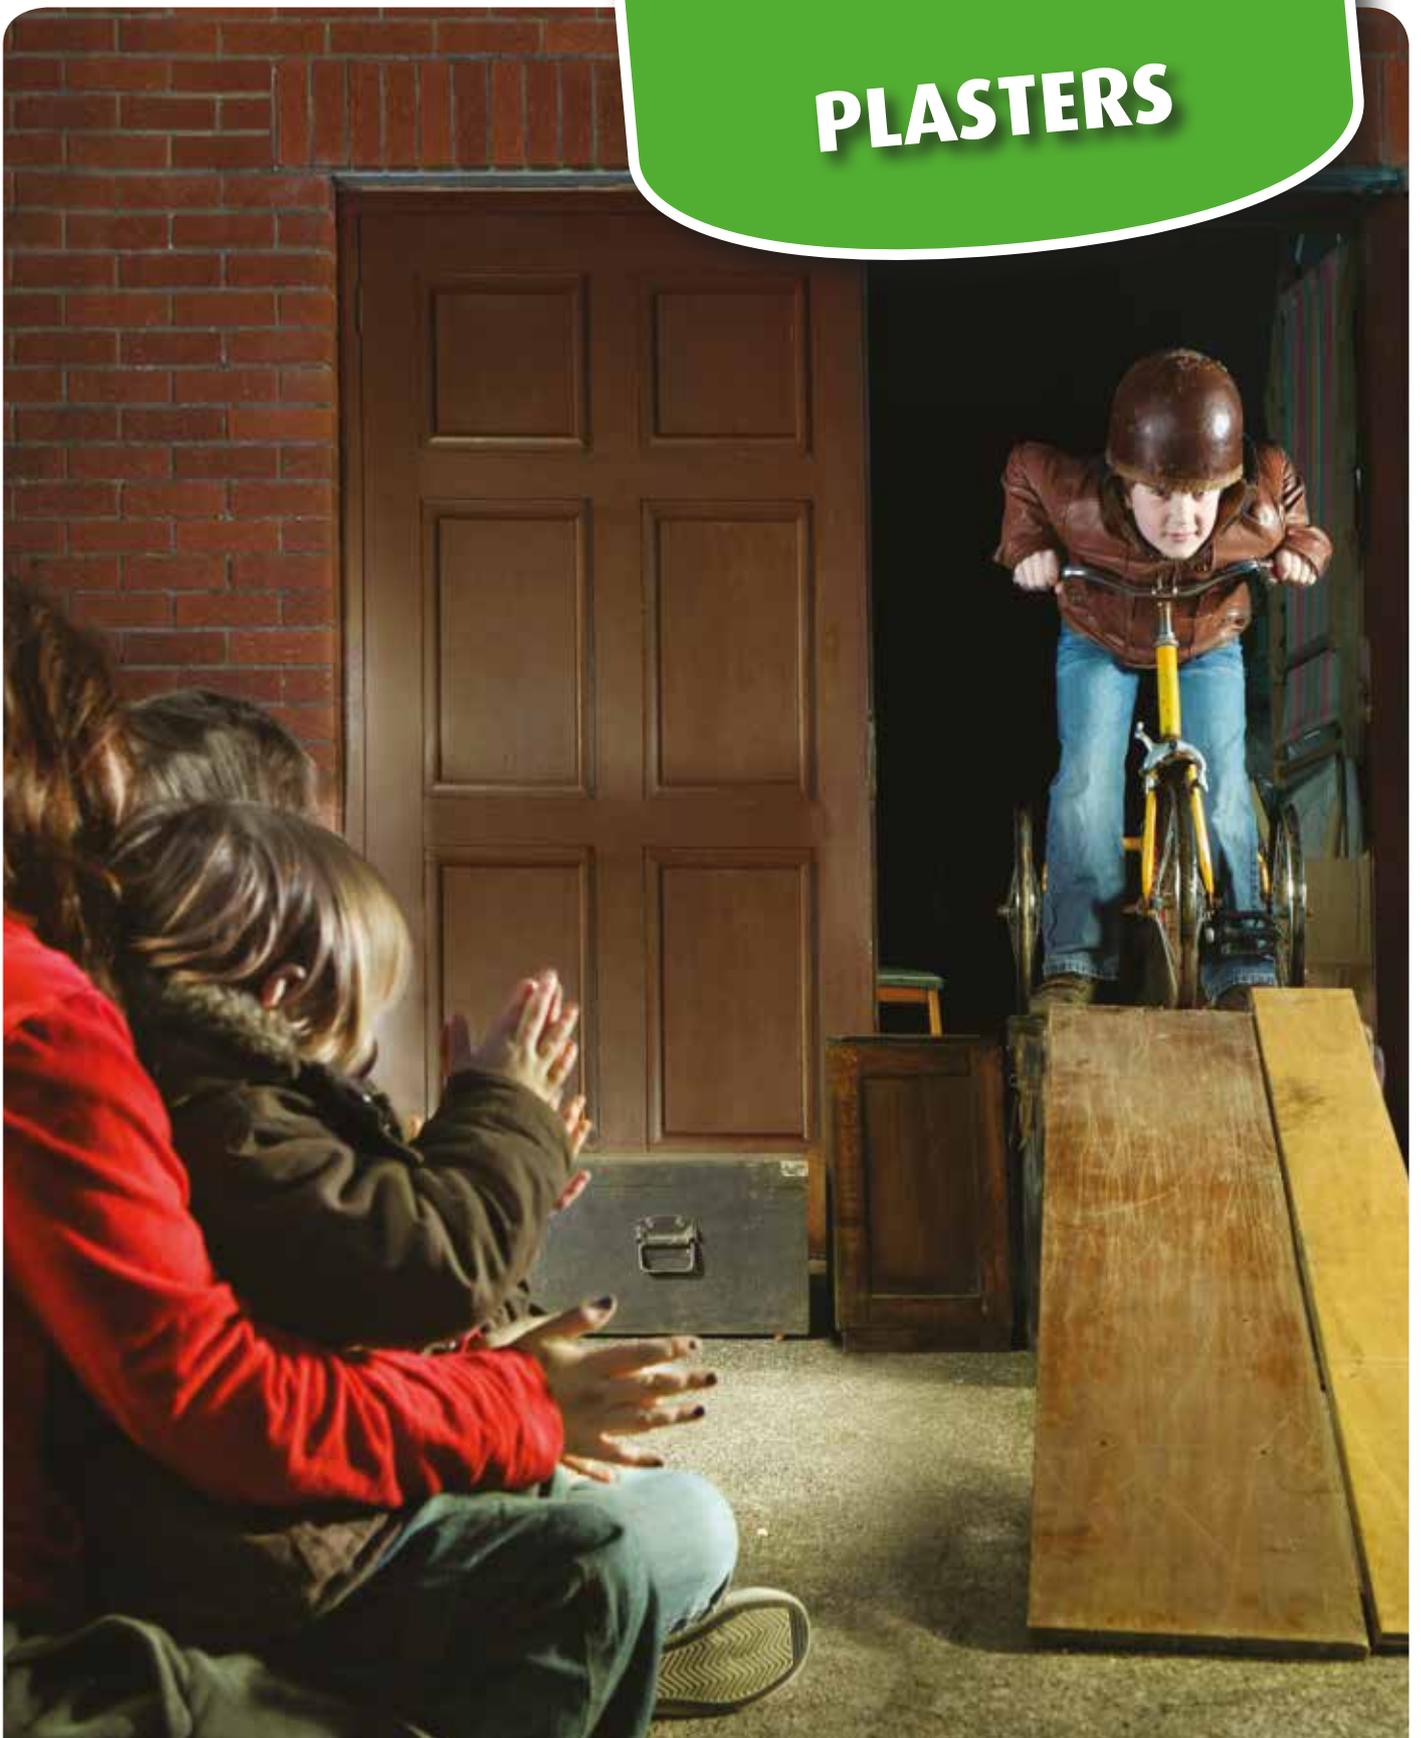

Since the beginning of the 90's Betasan has become the market leader in the domestic market and today it exports its products to more than 66 countries including Serbia, Russia, Norway, Ukraine, Romania, Poland, Turkmenistan, S.Arabia, Libya, Slovakia, U.A.E. Spain, Czech Republic, Germany, England, Bosnia & Herzegovina, Greece, Armenia, Azerbaijan, Iran, Macedonia, Ireland, Iraq, Yemen, Estonia, Belgium, Croatia, Belarus, Italy, Cyprus, Kenya, South Africa, Sweden, Slovenia, Australia, France, Hungary, Denmark, Oman, Pakistan, Portugal, Malta, Mauritius, Switzerland, Latvia, Colombia, Georgia, Jordan, Kingdom Of Bahrain, Palestine, Albania, Morocco, India, Austria, Holland, Syria, Malaysia, Egypt, Lebanon, Canada, Kirghizstan, Sudan, Moldova, Brazil, Kosovo and Qatar Betasan manufactures its product in accordance with CE, FDA, ISO 9001, and ISO 13485 quality standards which are widely accepted around the world, and develops manufacturing standards in its field on a daily basis.

In order to develop product quality to maintain the highest quality standards and expand its product portfolio, Betasan has a fully equipped, in house laboratory and is being the first choice of health professionals and customers with its portfolio which is being expanded with new products every year.

Our goal is to be the first choice of consumers and health professionals around the world, just as we are in the Turkish market in the fields of plasters, bandages, adhesive bandages and chronic wound management.

PLASTERS

healthy solutions...

PLASTERS

BETAPLAST

Zinc Oxide Based Surgical Cotton Plaster

Betaplast is a medical plaster made of skin coloured textile fabric. Zinc Oxide based adhesive provides long lasting adhesion and is water, sweat and moisture resistant. Allows skin to breath. It does not leave adhesive residues when removed. Easily tearable lengthwise and widthwise. X-ray permeable.

Intended Use;

- Fixation of materials such as catheters, bandages, covers, etc.
- Fixation of hard and heavy materials.
- For patients with a not very sensitive skin, normal skin structure.

Usage

BETAFIX

Elastic Non-Woven Fixation Plaster

Betafix is a hypoallergenic medical tape made of porous, elastic nonwoven fabric. Its porous structure allows skin moisture to pass through and skin to breathe. Hypoallergenic adhesive does not cause any skin irritation and maceration. Its elastic structure adapts easily to joints and folded areas of the body. Protective paper on the back allows easy removal and application. X-ray permeable.

Intended Use;

- Fixation of materials such as catheters, bandages, dressing materials, etc.
- Used especially on joints, angular and prominent parts of the body without constraining movement.
- For patients with sensitive skin.

Usage

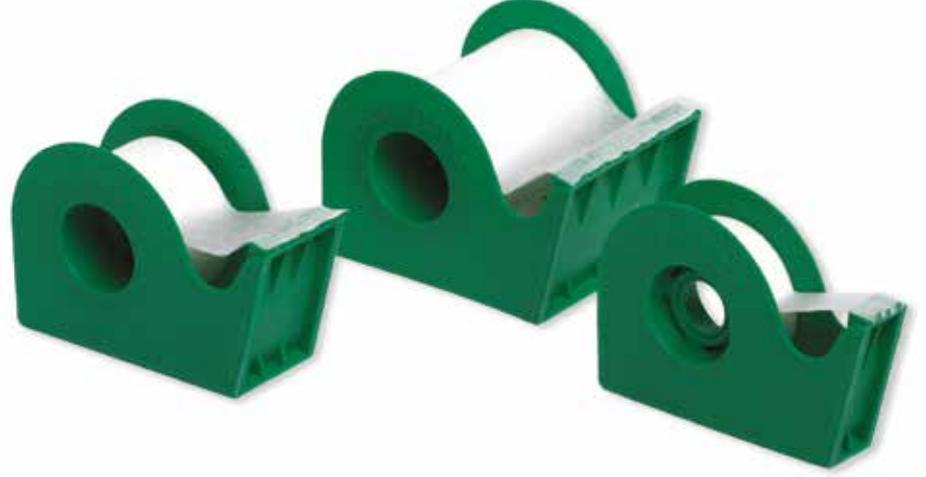

Code	Description	Qty / Carton
5502	Betafix 5 m x 2,5 cm	240 individual boxes
5505	Betafix 5 m x 5 cm	120 individual boxes
5510	Betafix 5 m x 10 cm	60 individual boxes
5102	Betafix 10 m x 2,5 cm	240 individual boxes

5115	Betafix 10 m x 15 cm	40 individual boxes
5120	Betafix 10 m x 20 cm	32 individual boxes
5130	Betafix 10 m x 30 cm	20 individual boxes

BETAPORE

Microporous Paper Surgical Plaster

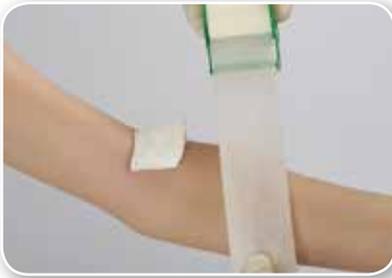

Betapore is a hypoallergenic medical plaster made of nonwoven fabric. Its microporous carrier allows skin moisture to pass through and skin to breathe. Hypoallergenic adhesive does not cause any skin irritation and maceration. Its soft and thin structure makes it applicable to folded body areas. X-ray permeable.

Intended Use;

- Fixation of materials such as catheters, bandages, covers, etc.
- For patients with very sensitive skin. It is also used in children, elderly and in sensitive areas of the body.

Usage

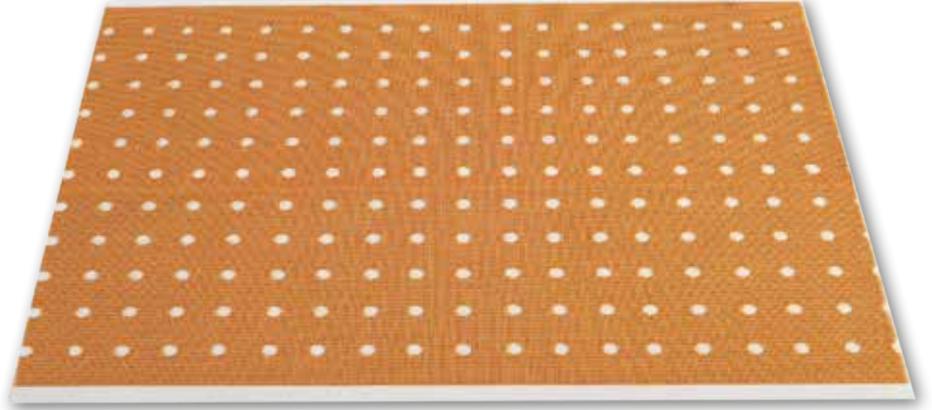

Code	Description	Qty / Carton
6101	Betapore 9.14 m x 1.25 cm-Box of 24	10 Boxes / 240pcs
6102	Betapore 9.14 m x 2.5 cm-Box of 12	10 Boxes / 120pcs
6105	Betapore 9.14 m x 5 cm-Box of 6	10 Boxes / 60pcs
6107	Betapore 9.14 m x 7.5 cm-Box of 4	10 Boxes / 40pcs
6501	Betapore 5 m x 1.25 cm	200 individual boxes
6502	Betapore 5 m x 2.5 cm	120 individual boxes
6505	Betapore 5 m x 5 cm	100 individual boxes

SANITAYAKI

Capsicum Plaster

Sanitayaki is a plaster with Zinc Oxide based adhesive, containing capsicum, and applied onto various painful areas of the body. Sanitayaki can be used for therapeutic purposes, because the active substance capsicum acts on agent P, which is an effective vasodilator (dilates blood vessels). Capsicum prevents agent P from being further synthesized and transported in neurons. Hence it relieves pain. The structure of the carrier allows skin to breathe.

Intended Use;

- Provides quick pain relief for various pains of the body due to rheumatism, lumbago, sciatica, muscular and joint pains.
- Sanitayaki is for patients with normal and sensitive skin.

Usage

Code	Description	Qty / Carton
500	Sanitayaki - Box of 50	20 boxes / 1000pcs

INJECTION SERIES

healthy solutions...

BETA-AID Injection Tape

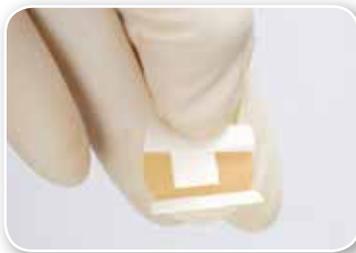

Beta-aid is an injection strip used after injections. Perforated structure of the polyethylene carrier allows skin moisture to pass through and skin to breathe. Hypoallergenic adhesive does not cause any skin irritation and maceration (which occurs when excessive moisture forms between the skin and plaster). Easily applicable to folded body areas with its round shape.

Intended Use;

- Protects the injection hole against dirt and fluids after injection and vaccination.

Usage

Code	Description	Qty / Carton
15200	Beta Aid 22mm -Pack of 100	100 boxes / 10'000pcs
15210	Beta Aid 22mm -Pack of 1000	20 boxes / 20'000pcs
15250	Beta Aid 38mmX38mm -Pack of 500	17 boxes / 8'500pcs

BETADIALIS Haemostasis Pressure Tape

Betadialis is used for covering the needle hole on the skin after haemodialysis and blood withdrawal. The special pad in the centre absorbs and retains the blood in the application area. During this absorption process the pad swells and thickens, and stops bleeding by applying pressure on the needle hole. Betadialis provides a secure environment by protecting the large needle hole against penetration of microorganisms and fluids.

Intended Use;

- To protect the large needle hole from penetration of microorganisms.
- In case of bleeding, absorbent pad stops bleeding by swelling and applying pressure.

Usage

Code	Description	Qty / Carton
15310	Betadialis-Pack of 100-Small 38x38	20 boxes / 2000pcs
15300M	Betadialis-Pack of 50-Medium 38x72	20 boxes / 1000pcs
15300	Betadialis-Pack of 50-Large 38x92	20 boxes / 1000pcs

BETADERM

Catheter Fixation Tape

Betaderm I.V. Catheter Fixation Tape allows air to permeate and moisture to evaporate which allows skin to continue with its normal functioning. It stretches to fit all parts of the body.

Betaderm I.V. Catheter Fixation Tape comes in 2 types (with non-woven structure and with PE structure): With and without pad. The special pad can absorb the seeping blood.

Intended Use:

- Its hypoallergenic, pressure sensitive medical acrylic adhesive makes Betaderm Catheter Fixation Tape especially suitable for use in sensitive skin and repeated application.
- Used as fixation tape for central and peripheral IVs.

BETADERM Catheter Fixation Tape - Non Woven

Usage

Code	Description	Qty / Carton

BETADERM FILM

I.V. Cannula Fixation Tape - Transparent PU

Betaderm Film I.V. Catheter Fixation Tape offers many advantages in catheter fixation with its transparent polyurethane structure and easy application. Allows air to permeate and moisture to evaporate which allows skin to continue with its normal functioning (semi-permeable). It stretches to fit all parts of the body.

Intended Use;

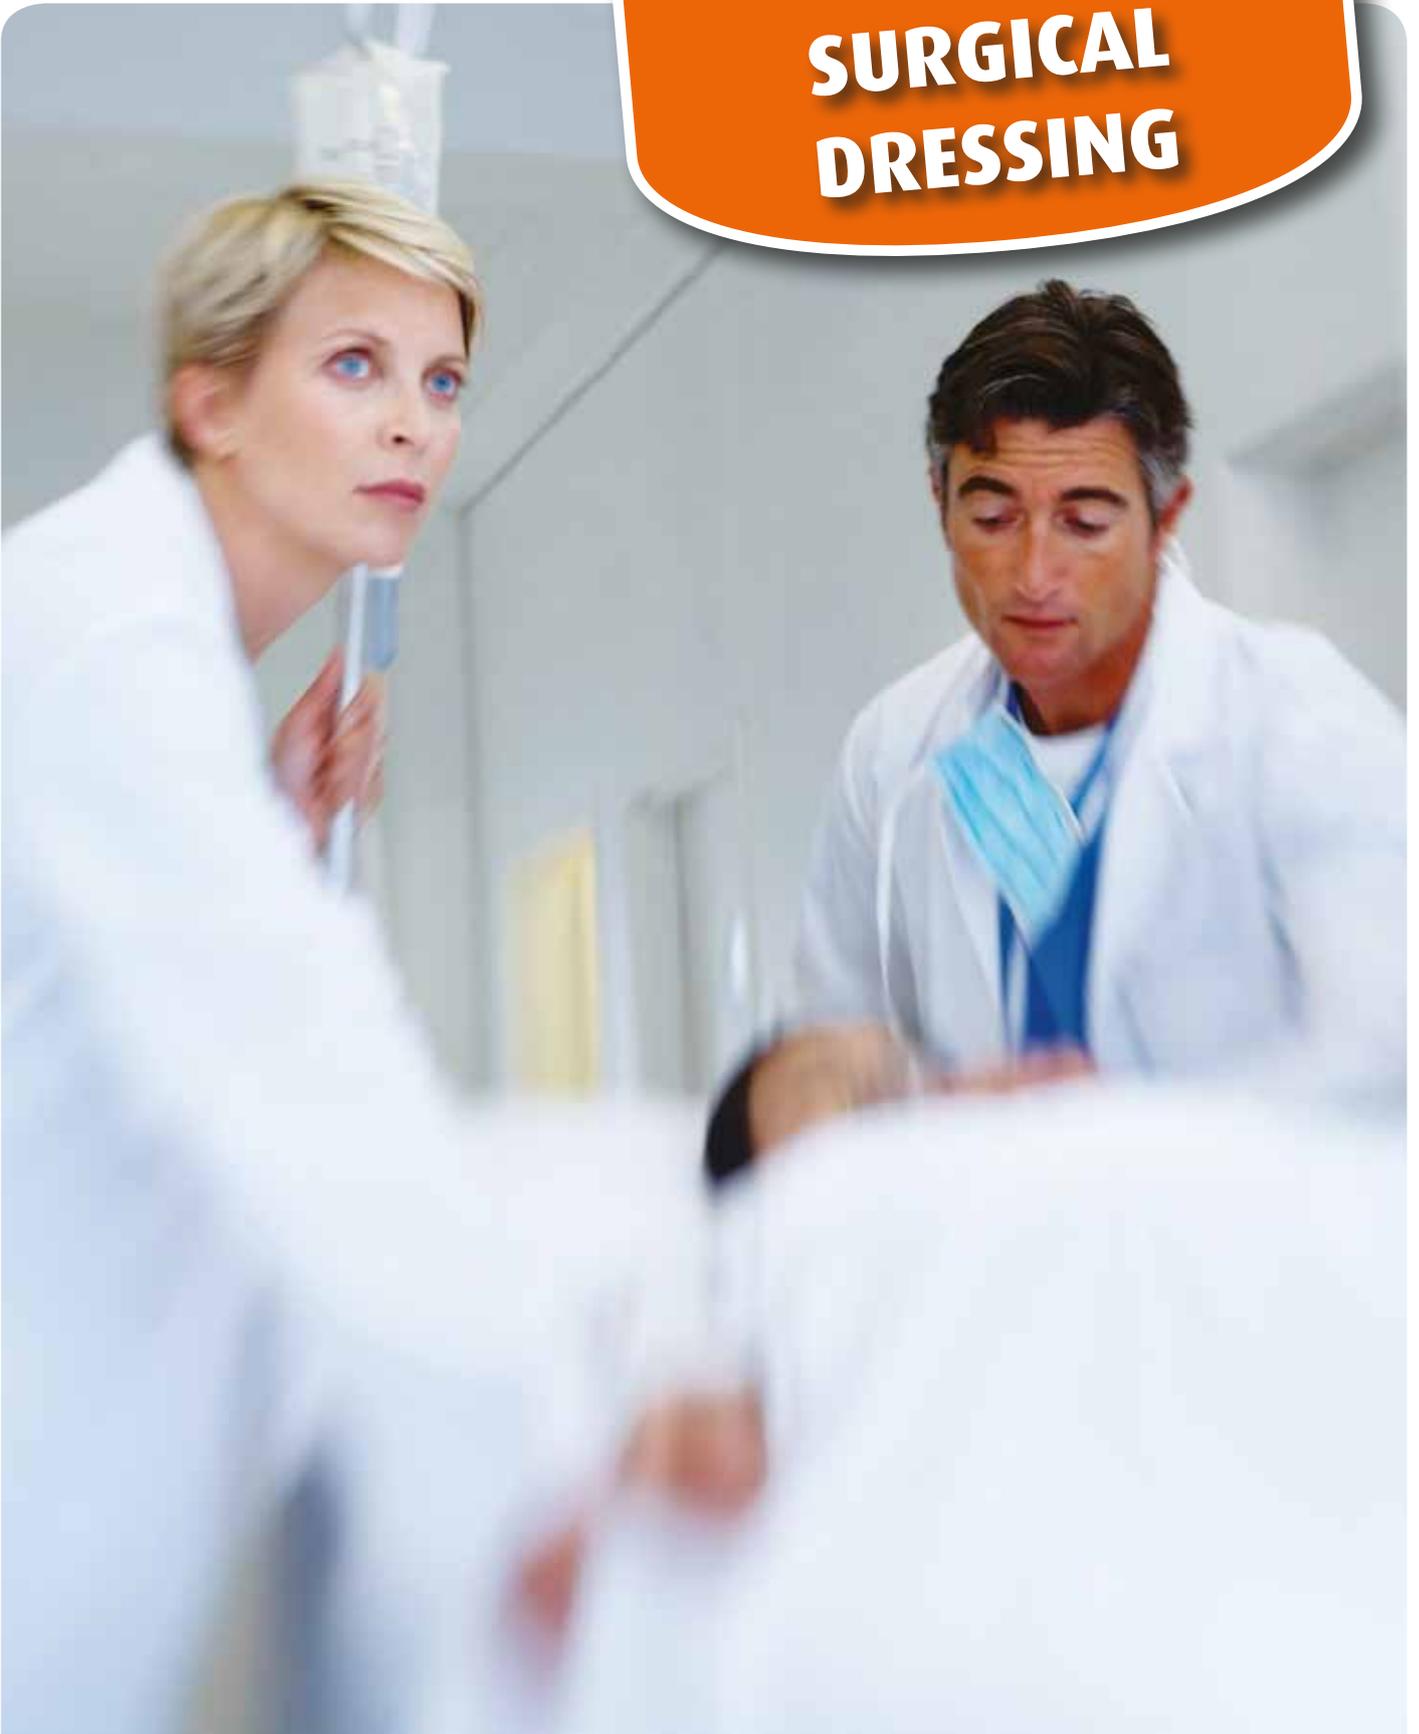

- Used as fixation tape for central and peripheral IVs.

Usage

Code	Description	Qty / Carton
8507	Betaderm PU-Pack of 50-Small 7cm x 6cm	20 boxes / 1000pcs

SURGICAL DRESSING

healthy solutions...

SURGICAL DRESSINGS

BETAPAD Adhesive Surgical Dressing

Betapad is a hypoallergenic medical plaster made of porous, elastic non-woven fabric. Its porous structure allows skin moisture to pass through and skin to breathe. Hypoallergenic adhesive does not cause any skin irritation and maceration. It is water-resistant; it protects the wound against moisture and dampening. It fits easily to difficult areas such joints, feet, fingers and knees, and folded parts of the body. Special pad in the centre absorbs blood and exudate; provides a soft barrier for the wound against external factors.

Intended Use;

- Protect the wound by providing a barrier against external factors.
- The product is used to cover the surgical cuts, burnt areas, chronic wounds and IV catheters.
- Betapad is for patients with normal and sensitive skin.

Usage

Code	Description	Qty / Carton
8007	Betapad 5 cm x 7.5 cm (Box of 50)	4 Boxes / 200pcs
8009	Betapad 5 cm x 9 cm (Box of 50)	4 Boxes / 200pcs

8030	Betapad 9 cm x 30 cm (Box of 25)	4 Boxes / 100pcs

BETASTRETCH Adhesive Surgical Dressing

Betastretch is a hypoallergenic medical plaster made of porous, elastic non-woven fabric. Its porous structure allows skin moisture to pass through and skin to breathe. It easily fits difficult areas such joints, feet, fingers and knees, and folded parts of the body. Special pad in the center absorbs blood and exudate; provides a soft barrier for the wound against external factors.

Intended Use;

- Protects the wound by providing a barrier against external factors.
- The product is used for covering any surgical cuts, burn areas, chronic wounds and IV catheters.

Usage

Code	Description	Qty / Carton
8906	Betastretch 6 cm x 5 m	24 individual boxes
8908	Betastretch 8 cm x 5 m	18 individual boxes
8910	Betastretch 10 cm x 5 m	12 individual boxes

EYEPAD

Adhesive Surgical Eyepad

Sanitabant Eye Pad is a self-adherent eye bandage. Ready-to-use, protects the eye from the light with a sterile or non-sterile cover pad. Hydrophobic back material helps maintenance of physiological functions of the skin and reduces the maceration risk. It also prevents heat congestion in the orbit with its high permeability both to air and water vapor. Its anatomical shape ensures easy and accurate application even when used under glasses. The black padded version of Eyepad is used in children for Strabismus treatment.

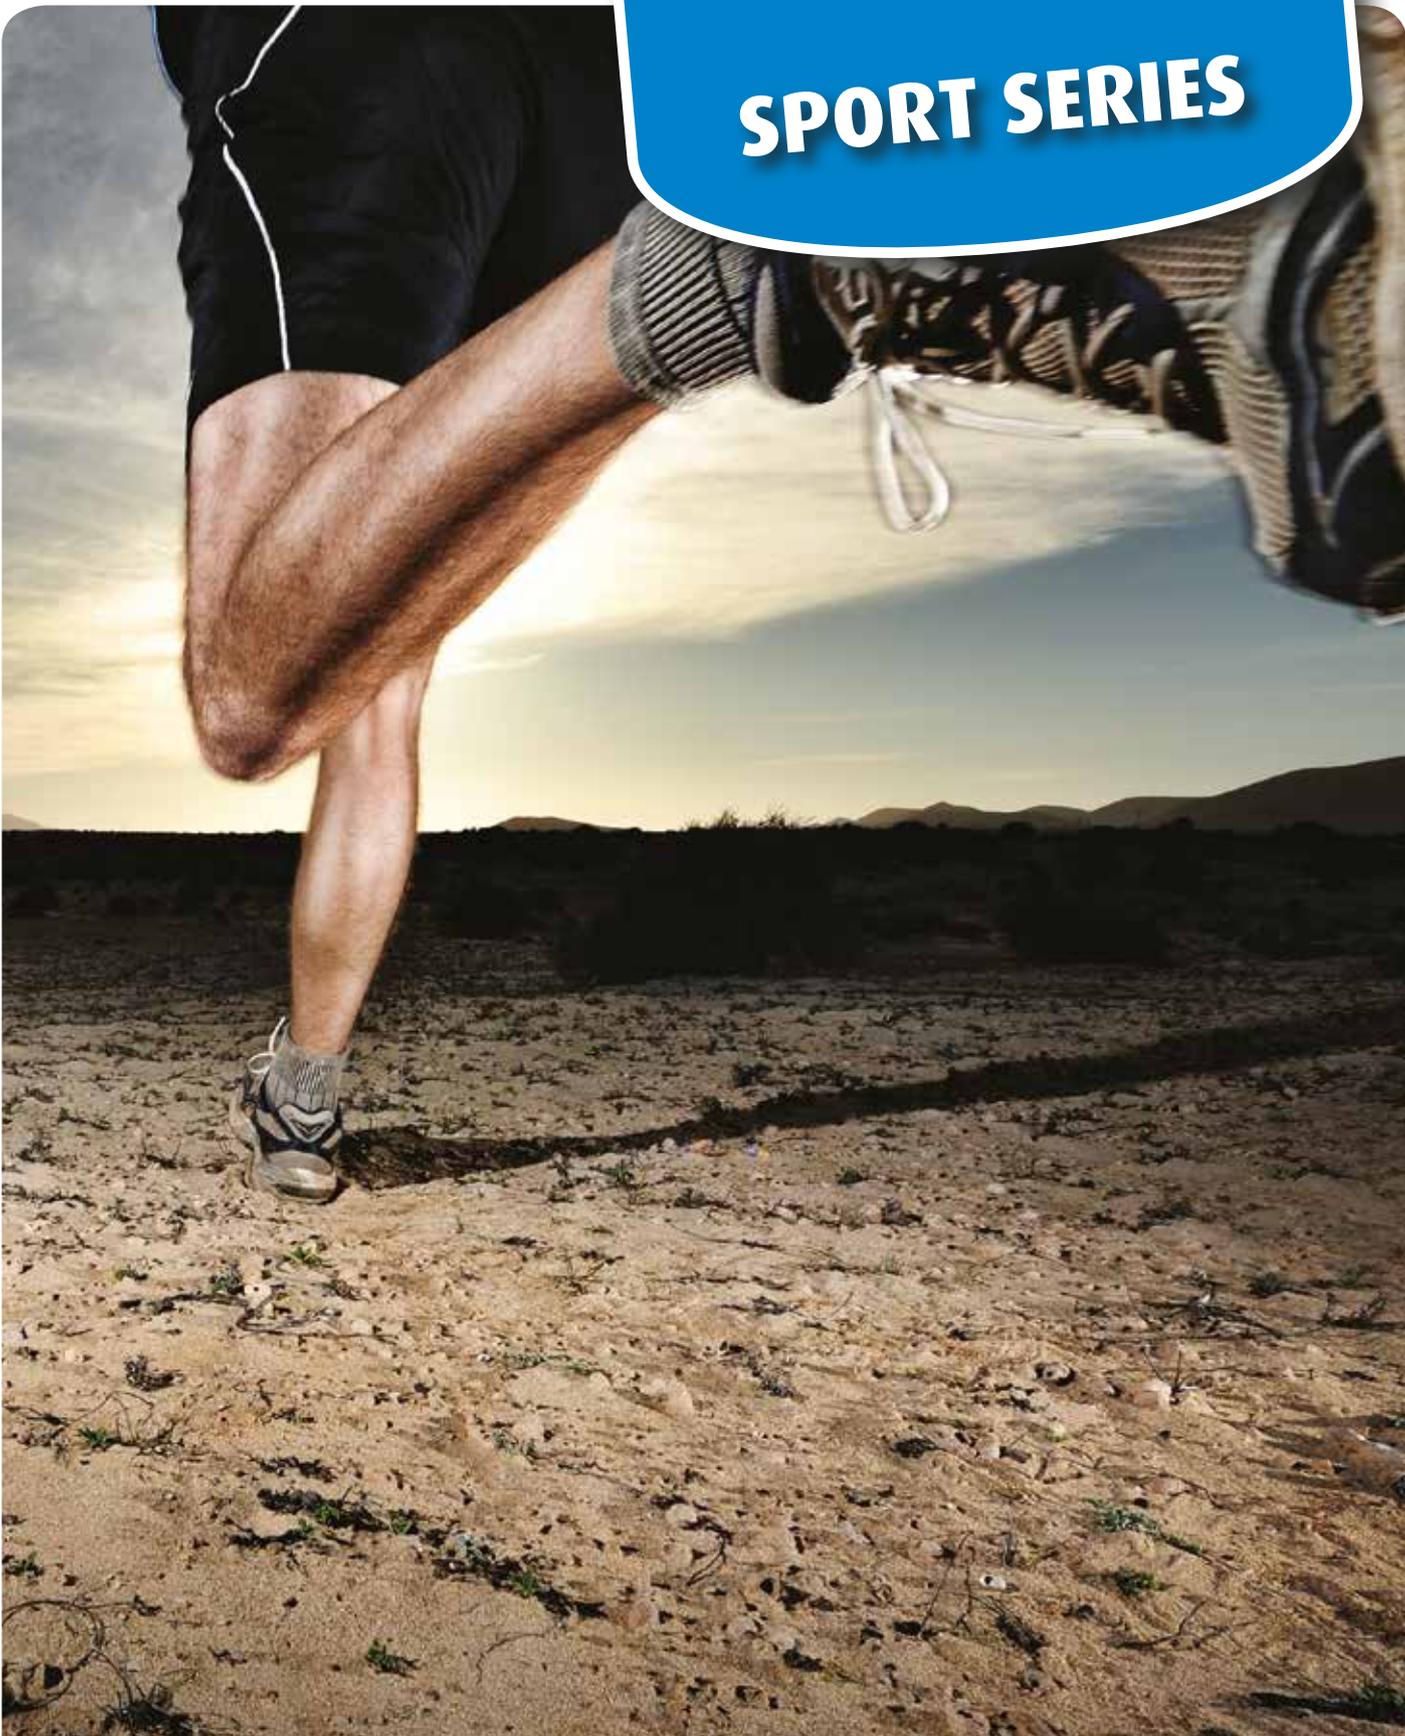

Intended Use;

- Hypoallergenic acrylic adhesive is suitable for sensitive skin and repeated applications.
- Used for Strabismus treatment in children.

Usage

BETABAN

Cohesive Elastic Bandage

Betaban is a porous, elastic, self-adhesive, non-woven bandage made of polyester and coated with a cohesive material. Betaban sticks only to itself and not to skin. Therefore removing Betaban from the application area is painless and easy. The bandage can easily be applied to folded areas of the body such as elbows and knees. Does not slip or curl up. Its porous structure allows the wrapped area to breathe. It does not take up liquid.

Intended Use;

- To ensure protection during sports activities.
- To fix pads or compresses.
- To apply pressure on a certain body area.
- Betaban is for patients with sensitive and normal skin.
